## FAQ

### How do I sign up to submit my feed to Zillow?

Go to [www.zillowfeeds.com](http://www.zillowfeeds.com), fillout the form, and enter the feed URL, if you have it. Then click “Submit”. We will contact you soon to share further details and to complete the setup process. If you encounter any problems, e-mail [feeds@zillow.com](mailto:feeds@zillow.com) for assistance.

### What communication protocols do you support?

We support HTTP and FTP protocols. If your feed is password protected, please contact us at [feeds@zillow.com](mailto:feeds@zillow.com) and we'll set things up to maintain that security.

### What kind of feed formats do you support?

We support two types of XML feeds:

- ▶ **ZIF (Zillow Interchange Format):** This is our own feed format that will allow you to create rich listings on Zillow. See the Zillow Interchange Format specification.
- ▶ **TFF (Trulia Feed Format):** If you have a feed set up with Trulia, you can use that same format for Zillow.

### Who do I contact in case something isn't working correctly?

Please contact Zillow Customer Support via e-mail at [feeds@zillow.com](mailto:feeds@zillow.com).

# XML GUIDELINES

Some characters will not display as intended after the XML is parsed. There are two different methods you can use to ensure that your text is displayed correctly.

## Entity Reference

Please refer to the following table and replace any of these characters with the respective entity reference.

Character	Entity Reference	Description
&	&amp;	Ampersand
'	&apos;	Apostrophe
>	&gt;	Greater Than
<	&lt;	Less Than
"	&quot;	Quotation Mark

## CData

Enclose tag values in a CDATA section, as described in the following table.

Begin CDATA section	<![CDATA[
End CDATA section	]]>
Example	<tag> The text that you provide goes here]]&lt;/tag&gt;</td> </tr> </tbody> </table> </div> <div data-bbox="94 577 234 595" data-label="Section-Header"> <h2>Case Sensitivity</h2> </div> <div data-bbox="94 598 889 652" data-label="Text"> <p>In addition to ensuring that your XML is parsed correctly, it is also important to note that the ZIF elements and corresponding values are case sensitive. For example, <code>&lt;PropertyType&gt;SingleFamily&lt;/PropertyType&gt;</code> will be accepted successfully, whereas <code>&lt;Propertytype&gt;singlefamily&lt;/Propertytype&gt;</code> will not be.</p> </div> <div data-bbox="94 683 419 718" data-label="Section-Header"> <h1>FEED FORMAT</h1> </div> <div data-bbox="94 722 896 757" data-label="Text"> <p>By using the Zillow Interchange Format (ZIF), you can include as much detail about a home as you'd like. Obviously, the more information you can supply, the more attractive the home will be to a potential buyer.</p> </div> <div data-bbox="94 774 908 829" data-label="Text"> <p>The only fields required are address, contact e-mail, sale price, and status; all of these fields are shown in bold in the XML below. However, if an alternate contact e-mail address is provided in the Zillow Listings Feed sign-up form (e.g., an e-mail address for a centralized call system), then the <code>&lt;email&gt;</code> field is not required in the feed.</p> </div> <div data-bbox="94 851 250 869" data-label="Section-Header"> <h2>XML Specification</h2> </div> <div data-bbox="94 869 424 928" data-label="Text"> <pre>&lt;Listings/&gt;   &lt;Listing/&gt;     &lt;Location/&gt;       &lt;StreetAddress/&gt;</pre> </div>

## Element Descriptions

Some of the elements are labeled “Multiples Allowed”. These elements can have multiple selections nested within them. For example, to specify that a property has both a mountain view and a water view, the XML would look like this:

```

<ViewTypes>
    <ViewType>Mountain</Viewtype>
    <ViewType>Water</Viewtype>
</ViewTypes>

```
